Egro 5513

1 Step Simplicity

A Swiss-made super-automatic espresso machine designed with easy functionality and sleek styling. This machine will grind, tamp, brew, steam and froth milk. The option to integrate a POS system offers endless beverage choices. Adaptable milk pump option available for under-counter refrigeration or side-mount refrigerator.

1 Brew Group The compact brewing unit is the powerhouse of the Egro, located just inside the door for easy service access. A heated brewing chamber maintains espresso temperature. Two independently controlled pistons provide controlled tamping pressure. The intelligent tamping system automatically adjusts to any environmental changes.

2 iSteam (Rancilio Patent) *Optional* This new totally automatic steam wand allows milk to be heated and frothed using a mix of steam and air, until a soft and remarkably compact cream is obtained. The innovative water system makes it the fastest and most powerful steam wand on the market (500 cc from 10°C to 65°C in 30 seconds). Two program selection buttons: "Cappuccino", to heat and froth the milk, or "Latte", to heat the milk only. The smart electronic control system injects air according to the quantity of milk present in the pitcher, giving constant quality time after time. When the programmed temperature is reached, the iSteam stops automatically. The user can set the final temperature of the drink and the quantity of air to be emulsified for both programs. The special stainless steel covering is heat-insulated to make it cool to the touch and extremely easy to clean.

Technical Features

programmable temperature-sensing steam wand with auto shut-off

deep brew chamber provides optimal extraction quality

programmable hot-water dispenser

hygienic coffee puck collection drawer

insulation ring for minimal grinding noise

accommodates cup sizes up to 32 oz

high-volume, heavy-duty Ditting grinders with simple grind adjustments for a consistent grind

automatic notification of cleaning and preventative maintenance along with water softener recharge

patented milk rinsing system ensures sanitary milk delivery lines for fresh, pure beverages every time

automatic steaming and foaming of milk

Endowments, accessories

ENDOWMENTS: 2 hoppers, 1 steam wand, 1 hot water dispenser programmable for dosage time, 1.5 gallon milk container, foot extensions.

ACCESSORIES: DP automatic or manual water softener

Colors

stainless steel painted metallic dark gray

stainless steel painted metallic light gray

other custom colors available

Technical Data
